

Advantages of QTimer®

The Most Comprehensive, Real-Time Drive-Thru Management System on the Market

QTimer Drive-thru Management System is the ultimate tool for the QSR drive-thru. QTimer's ability to follow the flow of vehicles in a drive-thru and be integrated with the POS system gives owners and managers unprecedented knowledge and control over their stores. This actionable information allows for immediate improvements, thus performance is enhanced and goals are more likely to be met. QTimer is more than a timer because it provides POS details with speed-of-service metrics for an expanded real-time view that has never been available before.

1. Real-time POS Integration

- An "order number" is assigned to each vehicle.
- The crew is able to focus on greater speed and order accuracy.
- Has the ability to pinpoint what service points and menu items cause bottlenecks.
- Provides greater security. (Identifies "voids", reduces fraud).

e. "Dynamic Drive-thru" metric speeds line by seeing order content from each vehicle in queue.

2. On-screen Performance Summaries

- Enable "in-store" and "above-store" managers to check daily performance at a glance, eliminating the need to go to the office to print reports.

3. Enterprise Management

- Easy maintenance, upgrades, and configuration of goals for one or more stores, from one location.
- QTimer® and the HyperView® OCB can run on the same PC.

4. Web-based "Reporting Portal"

- Easily access comparisons across stores or groups of stores.
 - Track performance at multiple locations – identify and reward top performers and assist under-achievers.
 - Incredible savings on time and travel. Regional managers need only travel to stores where problems are occurring and their presence can have an impact.
- The Enterprise Reporting System also provides real-time and near real-time alerts via any PC or smart phone.
